

## Protecting Your Research Subjects and Data Integrity: Medical Monitoring

*Quality medical monitoring is critical to the success of your trials*

### Protection. Integrity. Scientific Diligence.

Medical monitoring is an integral step in the development of your medical products to ensure the protection of your research participants and the integrity of your research results. Trials require that certain requirements be met to ensure patient safety, good clinical practices and regulatory compliance. We can help you ensure these obligations are both monitored and met.

*We can provide you with expert medical monitoring throughout your product development process.*

### Broad Therapeutic Experience

When choosing medical monitoring services, you need to know your experts have therapeutic experience that is directly related to your study. Our team's combined therapeutic experience includes the following areas:

- Women's health
- Osteoporosis and osteoarthritis
- Infectious disease, including HIV
- Diabetes and other endocrine disorders
- Oncology
- Cardiovascular
- Central nervous system disorders, including depression, schizophrenia, and attention deficit disorder
- Obesity
- Thrombolytics and DVT prevention
- Blood substitutes
- Pain control
- Gastrointestinal disorders

## Experience You Can Trust

Our medical monitors are all MDs and have the necessary training and clinical experience to effectively monitor your trials. They will assess your needs, devise a plan and implement it to ensure your trials are appropriately monitored.

## Expect Excellence

RTI-HS is small enough to provide truly personalized service, yet large enough to have the people, expertise and resources to effectively manage your medical monitoring process. Our clients have learned to count on us to deliver, with over 80% of our new projects coming from repeat business or referrals. You, too, will benefit from our commitment to quality, a collegial work environment, and straightforward processes.

With RTI-HS, you can expect a monitoring team focused on making your job easier and your study safer. We set high expectations for ourselves, so you can expect your trials to run more efficiently. As a result, you will be able to do less overseeing, reviewing and training, which will save you time and money. Most importantly, you can be confident that the well-being of your study participants is being protected.

## A Suite of Add-On Options

Although our medical monitoring service can be a stand-alone service, RTI-HS also can provide you with a suite of complementary services to assist you with your trial needs, including:

- Pharmacovigilance
- Data analysis
- Risk management
- Medical consulting
- Medical writing

We would be happy to provide a custom proposal that will meet your unique needs.

## Benefit from Our Medical Monitoring Services

Our medical monitors have experience helping a variety of global medical product companies, including:

- Small to large pharmaceutical and biotech companies
- Generic drug manufacturers
- Small to medium contract research organizations
